

Swing Trading Bulletin

Week 191,
Market Close,
11th Jan. 2008

NOTE: "SQ" is a market timing system for contrarian "swing traders" (2 weeks to 4 months). It is 100% sentiment and probability based. A unique process of "scoring" various sentiment input indicators derives a bullish probability for the market - SQ. This activates the trading model (above right) at certain trigger points.

Commentary

As flagged in last week's report, there were further market falls and a spike in bearishness as measured by our SQ indicator. At 65% bullish probability this is now near to the 70% level which will trigger a contrarian LONG trade. Although we are tempted to set up a limit order in anticipation of this, we will instead prudently wait for confirmation before doing so. If there are further NASDAQ falls in the coming week then we will be perfectly placed to take advantage.

Trading Model Rules

All trades are against the NASDAQ Composite and executed either:

- Against the coming week's opening level of the Composite index.
- Via limit/stop orders at a specified level as described in the prior week's report.

Zero transaction/trading costs assumed and no spread. No interest on cash balances. All stop and limit orders entered at the next market open on a "good until cancelled" basis; specified order levels correspond to the NASDAQ Composite. Cancellation can take place only within a report such as this. All trades executed at closest exact level (no fractions).

Current Trades and Open Positions

Trades Executed Last Week:

NONE.

Current Open Positions:

\$US 1,639,912 in cash.

Current Pending Orders/New Trades:

NONE.

Weekly Performance Track (11th Jan. '08)

Starting Capital: US\$1,000,000 (21st May 2004).

8 Winning Closed Trades, 0 Losing Closed Trades.

Change in NAV since 1 week ago: + 0.0%

Change in NAV since inception: **+64.0%**
