

# Swing Trading Bulletin

Week 205,  
Market Close,  
18<sup>th</sup> Apr. 2008

**NOTE:** "SQ" is a market timing system for contrarian "swing traders" (2 weeks to 4 months). It is 100% sentiment and probability based. A unique process of "scoring" various sentiment input indicators derives a bullish probability for the market - SQ. This activates the trading model (above right) at certain trigger points.

## Commentary

As our model has been forecasting with increasing confidence over recent weeks, the market broke upwards strongly in the last few days. Although the open LONG position is already showing a good profit, the model suggests there may be more to come. As more pessimism gets unwound the market will have no choice but to rise further.

## Trading Model Rules

All trades are against the NASDAQ Composite and executed either:

- Against the coming week's opening level of the Composite index.
- Via limit/stop orders at a specified level as described in the prior week's report.

Zero transaction/trading costs assumed and no spread. No interest on cash balances. All stop and limit orders entered at the next market open on a "good until cancelled" basis; specified order levels correspond to the NASDAQ Composite. Cancellation can take place only within a report such as this. All trades executed at closest exact level (no fractions).

## Current Trades and Open Positions

**Trades Executed Last Week:**  
NONE.

### Current Open Positions:

\$US 1,639,912 LONG opened at average level of 2230 (filled on 22<sup>nd</sup> Jan. at 2221 and 6<sup>th</sup> Feb. at 2282).
