

Swing Trading Bulletin

Week 214,
Market Close,
20th June 2008

NOTE: "SQ" is a market timing system for contrarian "swing traders" (2 weeks to 4 months). It is 100% sentiment and probability based. A unique process of "scoring" various sentiment input indicators derives a bullish probability for the market - SQ. This activates the trading model (above right) at certain trigger points.

Commentary

We suggested last week that if pessimism continued to brew there would be further falls in the market. This is indeed what seems to be happening. Our composite sentiment reading is now up to 63% bullish probability as we continue to bide our time in cash. We require further market falls and SQ to rise above 70% to trigger a fresh LONG. We await developments in the next few weeks with keen anticipation.

Trading Model Rules

All trades are against the NASDAQ Composite and executed either:

- Against the coming week's opening level of the Composite index.
 - Via limit/stop orders at a specified level as described in the prior week's report.
- Zero transaction/trading costs assumed and no spread. No interest on cash balances. All stop and limit orders entered at the next market open on a "good until cancelled" basis; specified order levels correspond to the NASDAQ Composite. Cancellation can take place only within a report such as this. All trades executed at closest exact level (no fractions).

Current Trades and Open Positions

Trades Executed Last Week:

NONE.

Current Open Positions:

\$US 1,839,937 in cash.

Current Pending Orders/New Trades:

NONE.

Weekly Performance Track (20th June '08)
