

# Swing Trading Bulletin

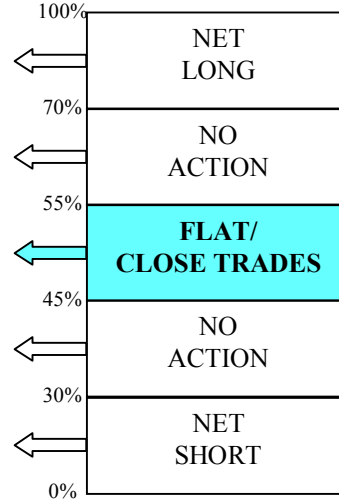

Week 67,  
Market Close,  
26th August 2005

SQ  
Bullish Probability

**NOTE:** "SQ" is a market timing system for contrarian "swing traders" (2 weeks to 4 months). It is 100% sentiment and probability based. A unique process of "scoring" various sentiment input indicators derives a bullish probability for the market - SQ. This activates the trading model (above right) at certain trigger points.

SQ  
Bullish Probability

TRADING  
MODEL

NASDAQ Composite  
CLOSING LEVEL

**26<sup>th</sup> Aug. 2005,**  
**Closing Level:**

**2121**

**SQ INPUTS**

The sentiment inputs come from the options market, market surveys, asset allocation and proprietary indicators.

## Commentary

The market continued its gentle drop through August as optimism continues to be shaken out. Although our SQ measure is at a neutral 50% there are recent signs that a LONG trade opportunity might soon present itself due to some notably bearish asset allocation and options positioning. It will be interesting to see the direction the market takes once substantial volume begins to return in the coming weeks.

## Trading Model Rules

All trades are against the NASDAQ Composite and executed either:

- Against the coming week's opening level of the Composite index.
- Via limit/stop orders at a specified level as described in the prior week's report.

Zero transaction/trading costs assumed and no spread. No interest on cash balances. All stop and limit orders entered at the next market open on a "good until cancelled" basis; specified order levels correspond to the NASDAQ Composite. Cancellation can take place only within a report such as this. All trades executed at closest exact level (no fractions).

## Current Trades and Open Positions

**Trades Executed Last Week:**

NONE.

**Current Open Positions:**

\$US 1,176,547 in cash.

**Current Pending Orders/New Trades:**

NONE.
