Bullish Probability

27th Oct. '06:
SQ = 67%

NOTE: "SQ" is a market timing system for contrarian "swing traders" (2 weeks to 4 months). It is 100% sentiment and probability based. A unique process of "scoring" various sentiment input indicators derives a bullish probability for the market - SQ. This activates the trading model (above right) at certain trigger points.

SQ INPUTS

The sentiment inputs come from the options market, market surveys, asset allocation and proprietary indicators.

Commentary

Last week saw little underlying change in the market and in our sentiment model. There is significant open interest on short term index puts. This is a contrarian bullish sign for the short term given the recent uptrend. We remain firmly LONG.

Trading Model Rules

All trades are against the NASDAQ Composite and executed either:

- Against the coming week's opening level of the Composite index.
- Via limit/stop orders at a specified level as described in the prior week's report.

Zero transaction/trading costs assumed and no spread. No interest on cash balances. All stop and limit orders entered at the next market open on a "good until cancelled" basis; specified order levels correspond to the NASDAQ Composite. Cancellation can take place only within a report such as this. All trades executed at closest exact level (no fractions).
