Week 181,  
Market Close,  
2<sup>nd</sup> Nov. 2007

**NOTE:** "SQ" is a market timing system for contrarian "swing traders" (2 weeks to 4 months). It is 100% sentiment and probability based. A unique process of "scoring" various sentiment input indicators derives a bullish probability for the market - SQ. This activates the trading model (above right) at certain trigger points.

SQ INPUTS

The sentiment inputs come from the options market, market surveys, asset allocation and proprietary indicators.

## Commentary

Last week saw little net movement in the NASDAQ despite some sharp swings. Recent media commentary has been fairly bearish which suggests from our contrarian perspective that the market may have the fuel to rise further. However, our composite model reading remains neutral at 51% so we continue to remain in cash.
