SQ INPUTS

The sentiment inputs come from the options market, market surveys, asset allocation and proprietary indicators.

NOTE: "SQ" is a market timing system for contrarian "swing traders" (2 weeks to 4 months). It is 100% sentiment and probability based. A unique process of "scoring" various sentiment input indicators derives a bullish probability for the market - SQ. This activates the trading model (above right) at certain trigger points.

Commentary

The market fell back last week but there was little change in underlying sentiment which remains delicately poised. On one side, despite the market dropping 1.8% there was little panic shown (i.e. no spike in volatility nor in fresh put buying). On the other hand, there is quite a bit of bearish money already positioned and a good degree of options protection is already in place. Hence we'll wait for this balance to be broken decisively by either the bulls or bears before taking action.

Trading Model Rules

All trades are against the NASDAQ Composite and executed either:

- Against the coming week's opening level of the Composite index.
 - Via limit/stop orders at a specified level as described in the prior week's report.
- Zero transaction/trading costs assumed and no spread. No interest on cash balances. All stop and limit orders entered at the next market open on a "good until cancelled" basis; specified order levels correspond to the NASDAQ Composite. Cancellation can take place only within a report such as this. All trades executed at closest exact level (no fractions).

Current Trades and Open Positions

Trades Executed Last Week:

NONE.

Current Open Positions:

\$US 1,240,024 in cash.

Current Pending Orders/New Trades:

NONE.

Weekly Performance Track (3rd Feb. '06)

Starting Capital: US\$1,000,000 (21st May 2004).

5 Winning Closed Trades, 0 Losing Closed Trades.

Change in NAV since 1 week ago: +0.0%

Change in NAV since inception: **+24.0%**
