

# Swing Trading Bulletin

Week 238,  
Market Close,  
5<sup>th</sup> Dec. 2008

**NOTE:** "SQ" is a market timing system for contrarian "swing traders" (2 weeks to 4 months). It is 100% sentiment and probability based. A unique process of "scoring" various sentiment input indicators derives a bullish probability for the market - SQ. This activates the trading model (above right) at certain trigger points.

## Commentary

There were volatile moves in the NASDAQ last week, though the sentiment backdrop did not change markedly. Our model's timing has been significantly out recently, however, we still expect a significant rally through the rest of December and perhaps into January. We are therefore comfortable remaining LONG.

## Trading Model Rules

All trades are against the NASDAQ Composite and executed either:

- Against the coming week's opening level of the Composite index.
- Via limit/stop orders at a specified level as described in the prior week's report.

Zero transaction/trading costs assumed and no spread. No interest on cash balances. All stop and limit orders entered at the next market open on a "good until cancelled" basis; specified order levels correspond to the NASDAQ Composite. Cancellation can take place only within a report such as this. All trades executed at closest exact level (no fractions).
